Labelling systems, equipped with thermal transfer printer

The WILUX System PAS1402 LabelStick, equipped with a **thermal transfer printer**, for labelling returnable plastic containers for food and non-food products with non-adhesive labels. The labels are printed from a continuous paper roll using the thermal transfer process, cut, provided via a special donation-module and then plugged in.

Automatic label application on returnable plastic containers in logistics.

WILUX System PAS1402 LabelStick

Labels and thermal transfer ribbons

Labels

WILUX is an expert in the production of multicoloured and unprinted labels in a wide range of shapes, sizes and materials, as well as in the realisation of high-quality special applications.

Trust our more than 40 years of expertise in the field of label production. We are able to offer you the right label for every product requirement.

Thermal transfer ribbons

WILUX thermal transfer ribbons are available in various qualities and colors and can be cut to length and width as desired.

To avoid electrostatic charging during the printing process and the associated damage to the print head, WILUX uses only high-quality thermal transfer ribbons.

Do you have further questions?
